

MSI's Virtual User Group May Meeting

WEBCAST: SYSTEM I PRODUCT UPDATE

NEW I5/OS LICENSING, HARDWARE MODELS AND OTHER ENHANCEMENTS

Thursday, May 3, 2007

12:00 p.m. to 1:00 p.m. Central

11:00 a.m. to 12:00 p.m. Mountain

10:00 a.m. to 11:00 a.m. Pacific

Duration: 1 hour

What is a Virtual User Group?

Thousands of System i and iSeries users cannot participate in local user groups due to distance and/or time constraints. Via the web, we bring the skills and resources to you!

Our Group's Mission

To showcase highly-skilled System i resources for users nationwide providing education and skills transfer in an open and collaborative learning environment.

Registration

Visit the MSI website to register for this virtual user group session at <http://www.msiinet.com/events/webcasts/>

Why a virtual user group?

We realize that many iSeries and System i users don't have access to local user groups, so MSI is pioneering a new "virtual" group designed to provide the same education and interaction that local groups offer. Leveraging web technologies, we will bring together experts that will offer key insights on emerging System i topics in a format that is convenient for everyone.

Based on the group's interests and needs, coordinators from MSI will use their connections at IBM and other key partner organizations to bring the group some of the top speaking resources in the country. By hosting the user group via the web, we will have access to a more diverse crowd of technologists and users from the entire United States bringing new perspectives to the group.

May 3 Meeting: April IBM Announcement Update

On April 10, IBM announced two new System I models, new i5/OS licensing offerings, a new security tool, a new web enablement offering and enhancements to the 3Com telephony suite. They also announced hardware and software withdrawal notifications as well as selected pricing changes.

Please join us as we welcome Kurt Rump for an overview of these new IBM product announcements.

Guest Speaker:

Kurt Rump provides consultative market support to System i clients worldwide. Based at the IBM Executive Briefing Center in Rochester, Minnesota, he has guided customers in their IT investments throughout the evolution of the System i product line. Prior to joining the Briefing Center, Kurt led an Industry Strategy team in the Rochester lab, defining requirements and solutions for successful participation in key sectors and held other product planning assignments associated with bringing the System/36 and AS/400 to market.

About MSI Systems Integrators

At MSI Systems Integrators we work with you to translate information technology into real, tangible solutions. We help you become more efficient, secure, resilient, organized, connected and smarter by leveraging solutions around enterprise management, security, business continuity, content management, business integration and business intelligence. A leading provider of hardware, software and services, MSI brings deep technical skills and partnerships with technology leaders such as IBM, Vision/iTera, PowerTech and more to provide world-class business solutions that help companies be more responsive, productive, and resilient. Together, we help you make

Your Business. Better.
